

## Alvarion implements TAS on a global scale

### Quick Facts about Alvarion:

- Innovation in wireless broadband IP based technologies
- World's preferred 4 Motion end-to-end 4G mobile solution
- Founded: 2001
- Employees : 560 (Till end of 2010)
- Frequent travel with over 3000 trips per year
- Global organization with over 25 offices world-wide
- Publicly-traded (NASDAQ: ALVR)

### Prevailing factors for Alvarion's decision to implement TAS:

- Tight budget control of all travel expenses
- Since the majority of Alvarion's customers are overseas, travel expenses are a significant component of their overall business operations
- Despite the fact that Alvarion is a strong competitor in its space, it still has to adhere to a strict budget to maintain its competitiveness
- Alvarion's global footprint requires the ability to centrally manage local budgets
- Powerful auditing engine that allows auditing all trip related activities within the entire trip cycle:  
(New Travel Request → Approvals → Trip Closure)

### Project Achievements:

- Implementation and strict enforcement of Alvarion's travel policy on a global scale
- Travel budget has not been exceeded even once since TAS' launch in 2008
- Reduction in the number of days between travel request and departure date which translated into substantial cost savings
- Creation of global travel visibility and central control
- Efficient process – no more paperwork
- Data quickly and easily accessible
- Wide range of custom made reports that catered to Alvarion's business needs
- Custom-built solution that enabled modifications according to Alvarion's business requirements
