

## Retalix chooses ComBTAS for total Travel Management control

### About Retalix

Market Sector: COMMERCE & SERVICES

Market Subsector: SOFTWARE

Travelers: More than 2000

Founded: 1982

Publicly Traded: (NASDAQ: RTLX)

Retalix is a global provider of integrated software solutions for the food, fuel, and consumer goods, retail and distribution industries.

Retalix's solutions serve the needs of grocery chains, independent grocers, convenience and fuel retailers, and food, beverage, and consumer packaged goods distributors.

### What were Retalix's business requirements?

- To achieve control and monitoring of global travel activities
- To facilitate travel management operation within the company
- To create a streamlined process fully interfaced with Retalix ERP (Oracle)
- To replace an obsolete system for a more efficient one

### Notable Achievements and Advantages with TAS

- TAS interfaced with Retalix's existing ERP system (Oracle) from day one, with interfaces such as users, organizational tree, exchange rates, ERP segments and finance.
- The system enables the managers to track in real-time budget exceptions project by project which made a significant positive impact
- The flight budget and costs are continuously being monitored in the approvals flow and by the analytics reports.
- The travel coordinators are able to enter changes and to track them efficiently.
- The reconciliation process based on the suppliers' statements is very simple to use.
- Full Global Implementation –more than 30 sites around the world in less than a year.
- Retalix believes that it can now leverage the advantages of the system for its own benefits by improved travel reporting & control.
